DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with N. Pederson on 25 July 2005.

In claim 1, lines 3-4, replace "a groove" with "a third groove"; in claim 1, line 22, replace "said groove" with "said third groove"; in claim 7, lines 3-4, replace "a groove" with "a third groove"; in claim 7, line 17, replace "said groove" with "said third groove"; in claim 13, lines 3-4, replace "a groove" with "a third groove"; in claim 13, line 23-24, replace "said groove" with "said third groove".

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

Claim 1, 7, and 13 are allowed. The applicant claims an optical module having a substrate with grooves, an optical fiber, one or more lens elements, a light emitting element, one or more wavelength branching filters, and a light receiving element. U.S. Patent 6,904,190 to Korenaga et al. teaches an optical package substrate **81** having a

Application/Control Number: 10/765,860

Art Unit: 2883

first groove 83a and a second groove 83b of identical structure and a slit groove 89 formed thereon; a laser (light emitting element) 86; a first lens 85b, set in the first groove, through which light exiting the laser 86 is converted into collimated light; an optical fiber 84 place having one end adjacent to a second lens 85a placed in the first groove 83a; light is converged through the first lens 85b and coupled into the optical fiber 84; an flat isolator 88, which may be replaced by an optical filter set in the slit groove 89 within an optical path between the laser 86 and the optical fiber 84. (See at least Fig. 8 and its description.) The optical package can be used in combination with a photo-diode 129 in another aspect of the invention by Korenaga. However, Korenaga et al. do not teach the optical paths of the instant application and how the optical filter is utilized in directing such optical paths. Claims 1, 7, and 13 are allowed because the these claimed optical paths in combination with prior art of record, taken alone or in combination, fails to disclose or render obvious a light receiving element that receives light of a wavelength, which is emitted from an optical fiber and enters via a wavelength branching filter, in combination with the rest of the limitations of the base claim. Claims 2-6, 8-12, and 14-18 depend on claims 1, 7, and 13 and therefore they are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In accordance with MPEP 707.05 the following references are pertinent in rejection of this application since they provide substantially the same information disclosure as this patent does. These references are:

- U.S. Patent 6,839,474 to Steinberg et al.;
- U.S. PGPub 2004/0264866 to Sherrer et al.;
- U.S. PGPub 20014/0026660 to Asakura et al.

These references are cited herein to show the relevance of the apparatus taught within these references as prior art. See form PTO-892 for additional references cited.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charlie Peng whose telephone number is (571) 272-2177. The examiner can normally be reached on 9 am - 6 pm M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank Font can be reached on (571) 272-2415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
